rd edition is still fine). There is a study guide available to accompany the textbook. You may wish to purchase the study guide if you would like extra practice solving problems. But doing so is not required.

**Course Overview**

Microeconomics is a branch of economics that studies how individuals, households, and firms make decisions to allocate limited resources, typically in markets where goods or services are being bought and sold. We will examine how these decisions and behaviors affect the supply and demand for goods and services, which determines prices and how prices, in turn, determine the supply and demand of goods and services.

After successful completion of this course you will be able to:

1. Explain key microeconomic concepts and models, and describe how they can be used
2. Utilize mathematics and graphing to illustrate economic concepts and to determine market equilibriums and the effects of market intervention on the equilibriums.
3. Show what economic concepts and principles can be used in an economic analysis of current events.

### **Respect for this Class and your Fellow Classmates**

Respect for this class and your classmates are necessary for an environment conducive to learning. With this in mind, chatting, early packing up and distracting behavior must be kept at a minimum. *There is a zero tolerance policy- If you are disruptive to the course you will be asked to leave.* Think ahead and be considerate to your classmates. If you must leave early please sit near the back of the class and towards an aisle so that your exiting does not disrupt other students.
