EXAMS

I will not give any make up exams and will not give exams early. The only exception is for student athletes with scheduled events on the date of the exams. Please check into this immediately and let me know as soon as possible. I require a signed letter from your coach or the athletics department. To reiterate, there will be **no make up exams**, please do not ask. Take note! If you are planning on leaving town, do not schedule your trip on an exam date.

The format of the exam will be multiple choice questions. Please bring a #2 pencil and a **non-graphing** calculator to every exam. Cell phone calculators are not be permitted. The use of a graphing calculator or cell phone during an exam will result in the item being confiscated.

Midterm exams are not cumulative. Exams will cover only the material covered in lecture. Students are not responsible for material covered in the text that is not covered in lecture. The final exam is cumulative – this means you will be tested on the material from the entire semester.

All exams, including the final exam, are held in the usual classroom.

Exam Schedule

RECITATION

The primary purpose of recitation is to increase your understanding of the material presented in lecture. TAs will briefly review the theory covered in lecture, followed by examples and practice problems. Recitation will be particularly helpful in preparing you for exams.

TAs will discuss their grading policies during the first class of recitation. You can expect to have 2 quizzes and 2 homework assignments during the semester. Recitation begins the week of **January 20th**, **2009**. For those who have recitation scheduled on Monday, January 19th, please discuss with your TA about attending a section later in the week.

HOMEWORK

There will be FIVE homework assignments this semester. You MUST purchase Aplia in order to complete this portion of the course.

You will have one week to complete the assignment from the time it is posted.

Due Dates

Homework 1: Thursday, January 22nd Homework 2: Thursday, February 5th Homework 3: Thursday, March 5th Homework 4: Thursday, April 9th Homework 5: Tuesday, April 21st

ARTICLE ANALYSIS

Find a recent article (within the past year) from a newspaper or magazine. Using what you have learned over the course of the semester, conduct an economic analysis of the article.

Specifically, explain how the topic of the article relates to economics and something you have learned through the course.

- Summarize the article (briefly).
- Explain how the topic of the article relates to economics and the specific topic(s) you learned in the course.
- Describe the topic in economics as it applies to the article.

For example, consider an article that discusses the impact of rising oil prices on biofuels. You could discuss how biofuels are a substitute for petroleum-based fuels and how a change in the price of oil would impact demand for biofuels. You could then extend this discussion by discussing how changing demand for corn for biofuels purposes impacts the market for corn intended for human or animal consumption.

You must pick two articles if you choose this option. One must relate to the microeconomics portion of the course, while the second relates to the macroeconomic portion of the course.
